A Luxury LED Display for Digital Design Innovation

Substantially more vivid than the highest caliber of TV displays, Luma Canvas boasts resilient LED technology designed to operate 24/7. Unlike traditional LCD monitors, the matte surface of Luma Canvas diminishes reflections and maintains deep blacks while the screen's emissive technology allows for superior contrast and brightness.

Seamlessly blending cutting edge technology and experiential design, Luma Canvas is the ideal product for use in innovative retail applications and modern corporate and hospitality environments.
